

Our **new UVC range** is designed to deliver faster, more reliable disinfection, creating a safer and cleaner environment. Using advanced UVC technology, these solutions are engineered to meet the highest standards in hygiene and infection control, providing effective protection against harmful pathogens.

Our product range includes:

UVMATIC® PureAir

UVMATIC® PureAir+

UVMATIC® AirSafe Steriliser

UVMATIC® WaterTrap Disinfector

UVMATIC® MultiTower

UVMATIC® MultiTower

The MultiTower delivers simultaneous UVC disinfection from five points, ensuring faster and more effective sanitisation in healthcare settings. It includes a central unit supported by four additional satellites for comprehensive coverage.

UVMATIC® AirSafe Steriliser

Integrating UVC light, titanium dioxide, activated carbon, and a HEPA 14 filter, this system effectively removes microbes, odours, and particles, delivering consistently purified air.

Benefits of Using UVC Products

Enhanced Hygiene

Effectively eliminates harmful bacteria, viruses, and pathogens for a safer environment.

Energy Efficiency

Low power consumption and long-lasting components, such as UVC lamps.

Odour Control

Neutralises unpleasant smells, ensuring fresher air in any space.

Cost-Effective

Reduces healthcare associated infection risks, saving on associated costs.

Versatile Applications

Designed for use across various environments, from small rooms to large, critical areas.

User-Friendly

Easy to install, maintain, and operate with programmable features for tailored usage.

Biofilm Prevention

Targets water traps and drains to reduce bacterial growth and prevent biofilm formation.

Improved Air Quality

Removes harmful particles, allergens, and microbes, ensuring healthier air.

UVMATIC® WaterTrap Disinfecter

The UVMATIC® WaterTrap Disinfecter reduces bacteria in sink wastewater, preventing biofilm formation and the spread of drug-resistant bacteria.

Easy to install and energy-efficient, it fits all sink types, lowers HCAI risks, and protects patient and clinician health.

UVMATIC® PureAir & PureAir+

The UVMATIC® PureAir purifiers use UVC technology and Photoplasma™ to eliminate odours, reduce harmful bacteria, and maintain a fresh, hygienic environment. It is a wall-mounted air purifier, recommended for use in sluice rooms, washrooms, and corridors.

The UVMATIC® PureAir+ is a portable, industrial-strength air purifier that is light and easy to carry. It features a built-in timer that can be programmed for efficient disinfection in unoccupied spaces.
